Allowable Subject Matter

Claims 1-4 and 6-7 allowed.

The following is an examiner's statement of reasons for allowance:

The prior art of records failed to teach all of the limitations in combination with the following underlined limitations.

1. (Currently Amended) A method for the providing network operator-specific performance features of different mobile radio network operators to a mobile radio customer, comprising:

providing a Smart Card for the mobile radio customer, configured to allow at least one subscriber relationship of the mobile radio customer with at least one mobile radio network operator to be defined,

defining at least two subscriber relationships on the Smart Card of the mobile radio customer, each subscriber relationship having different mobile phone numbers and separate performance features associated with the different mobile phone numbers,

assigning each subscriber relationship to a different mobile radio network operator, the separate performance features being available to the mobile radio customer based on the mobile radio network operator for that subscriber relationship,

redirecting calls at each network operator provided for the mobile radio customer, said call redirections being performed in all involved networks, except for the network of the current location of the mobile radio customer, by always pointing to the currently active identification and phone number of the mobile radio customer,

Art Unit: 2617

wherein the call redirections are newly set-setting the call redirections accordingly with each change of the mobile radio customer's location into a new one of the involved networks;

automatically renewing this renewed programming of the call redirection by means of appropriate intelligent technologies:

using the number of the mobile radio customer that is specific to a destination network of the call as the phone number that is transmitted in the calling line identification presentation function, regardless of the current location of the mobile radio customer; and

signaling the subscriber being called with the mobile phone number of the mobile customer that is specific for each given country or network.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
